

Quality and Function

Height-adjustable dome shaft with step all round for easy descent and access to filter.
See page 15

Empty conduit for tapping line, feeder, electrics, sensors, filter, backwash pipe and much more.

Filter syphon module Self-cleaning filter with syphon as odour lock - compact shape for optimal function.
See page 16

Tank overflow and filter overflow in one. No more joining of two overflows outside of the tank necessary.

Feet with flat surface for connecting two or more underground storage tanks for maximum storage volume.
See page 14

Gentle infeed reservoir prevents the sediment layer from being agitated by incoming flow of water. Improves water quality through oxygenation and mixing.
See page 16

Carrying handles on all sides for convenient transporting and handling of tank by 4 persons in garden.
